It is a white Christmas.

The GAZETTE-TIMES wishes to extend to all its many readers and friends, a merry and glad Christmas.

The "good-fellow" idea should be extended to that neighbor of yours who is less fortunate in the possession of this world's goods than yourself; see that he has some of this good Christmas, too.

We understand that the supervisor having in charge the work on the roads in the Heppner district was inclined to criticize our remarks last week concerning the condition of the road on which the accident to Mr. Brown occurred. We had no intention to say anything that was not justified by the facts, and our supervisor should be reminded that it is not necessary for a man to tie himself in his vehicle to keep from being thrown out by passing over the chuck holes in the road. It is the duty of the supervisors to see that the roads do not get in this condition.

In a communication to this paper, a neighbor of Mr. R. Hogeland, supervisor of the Par-

kers Mill road district, urges that gentleman's reappointment to this position. He has held this position for about four years past and has proven a good man for the place, and his neighbors think he should be retained because of the good service he has rendered. It has not been our fortune to pass over any of the roads in Mr. Hogeland's district, but we have understood from various sources that he understands his work well, and it has often been remarked that he is one of the best road builders in Morrow county. This being the case, he should certainly be retained for he is just the kind of a man to be on the job. We feel that we can endorse what our correspondent has to say with reference to Mr. Hogeland, and no doubt the County Court is sufficiently well posted on his work to compliment him with the appointment again should he desire to serve.

## 2-Way Sidehill Plow.

The accompanying cut illustrates the very latest improvements in Plow construction, showing several advantages over any other Sidehill Plow on the market.

One of the most important of these improvements is the extra long axle, making the distance between the wheels 8 inches greater than any other make of Plow. This of itself is a great advantage to the user, as it allows a greater adjustment of the bottoms, that

is, a 16 inch Plow can be made to turn 18 or even 20 inches of ground on sidehill work, and also makes the Plow much harder to upset on steep ground.

For further particulars call on **Vaughn & Sons** and see the Plow for yourself
